

UNCOMMON SOLUTIONS FOR UNMATCHED PERFORMANCE.

T-STAR plus Wafer Head Cabinet Screws

Designed for the installation of base and wall cabinets. Low-profile wafer head design offers an attractive larger surface area to securely attach cabinetry. Available in #8 and #10 sizes and in lengths from 1-1/4" to 3". T20 drive.

- Low-profile head design is ideal for the installation of fine cabinetry
- Wider head design offers increased surface area for draw down where flush or countersunk installation is not necessary or desired

MDF/Hardwood Screws

Specifically designed to prevent splitting in medium density fiberboard (MDF) and hardwoods without pre-drilling. Also very effective for attaching lightweight, high-density polyurethane trim.

- Unique CUT Point and patented thread serrations prevent splitting without pre-drilling
- *T-STAR plus* drive provides superior bit engagement
- Mini flat head design with cutting ribs under the head allows flush or countersunk installation for a clean look

Rear Panel Screws

Designed for attaching back panels to bookcases, storage units and cabinetry without deforming or damaging the panel.

- Low-profile wafer head design provides a larger surface area to prevent damage to the panel
- SPAX® patented thread serrations and unique 4CUT™ Point require no pre-drilling and prevent splitting
