

DO IT ONCE. DO IT RIGHT.

# Reliable, Long-Lasting Deck Assembly Solutions

For wood decking, railing, pergola and arbor projects, SPAX offers a wide selection of structural and deck screws that help ensure efficient, reliable construction for years of enjoyment. The SPAX German-engineered patented thread technology eliminates pre-drilling and provides faster, easier driving to reduce construction time. Code-compliant performance and coating systems offer the confidence for creating reliable assemblies.

SPAX® POWERLAGS® are the ideal replacement for the conventional lag. They're ICC-ES code-approved for ledger board and other structural applications. SPAX HCR® Coating is approved for treated lumber. Available in two head styles and the largest selection of sizes in the industry: 1/4", 5/16", 3/8" and 1/2" diameters and in lengths up to 12".

Code Recognized Report No. ESR-1782\*\*

\*\* Engineered coating systems for use in treated lumber.

SPAX® EXTERIOR/DECK SCREWS WITH HCR-X™ Coating are excellent multi-purpose screws for pressure-treated decking and railing balusters, and are tested for use in coastal building environments (Condition 4). Patented 4CUT™ Point and serrated threads resist splitting, and T-STAR plus drive offers superior bit engagement to prevent strip-out. No pre-drilling required. Available in #8, #9, and #10 diameters and in lengths from 1-1/4" thru 3-1/2".

SPAX® POWERDECK™ 304 STAINLESS STEEL DECK SCREWS provide premium corrosion resistance and are ideal for use in treated lumber, cedar and redwood. The unique Double ThreadLok™ design pulls and holds board tight to prevent screws from backing out and eliminates squeaking as lumber dries out. Trim head offers secure board attachment, while significantly minimizing its appearance across the deck surface. Patented 4CUT™ Point and serrated threads resist splitting, and T-STAR plus drive offers superior bit engagement to prevent strip-out. No pre-drilling required. Available in #8 and #10 diameters and in lengths from 1-5/8" thru 3-1/2"

SPAX® 304 STAINLESS STEEL MULTI-PURPOSE CONSTRUCTION SCREWS offer premium corrosion resistance for a wide variety of exterior applications, especially in treated lumber, cedar and redwood. Patented 4CUT™ Point and serrated threads resist splitting, and T-STAR plus drive offers superior bit engagement to prevent strip-out. No pre-drilling required. Available in #9 and #10 diameters and in lengths from 1-1/2" thru 3".
