## 304 Series Stainless Steel Screws

SPAX 304 Series Stainless Steel Screws offer premium corrosion resistance and long-term aesthetics in wood decking/railing, fencing and other exterior wood applications.

- T-STAR *plus* drive provides superior bit engagement.
- Patented thread serrations and unique 4CUT™ Point eliminate pre-drilling and help guard against splitting.
- Ideal for use in cedar and redwood applications to prevent possible staining of the wood caused by other exterior coatings. Also for coastal general construction applications.
- SPAX POWERDECK® Stainless Steel Screws with Double ThreadLok™ design pull and hold boards tight, preventing screws from backing out and boards from squeaking as lumber dries out.

T-STAR *plus* FLAT HEAD,  
DOUBLE THREADLOK™

304 SERIES STAINLESS STEEL  
DECK SCREW

DIAMETER	LENGTHS
#8	1-5/8"
#10	2-1/2", 3", 3-1/2"
